

2021 The 2nd International Summer Workshop on intelligent sensing, Southeast University July ~ August, 2021 Virtual events

The second International Summer Workshop on Intelligent sensing, Southeast University will be hosted by the School of Instrument Science and Engineering, Southeast University. The events will be held from July to August 2021. The summer program will continue to focus on modern intelligent perception, detection and data processing theories, and invite well-known professors from Japanese and British universities to teach online in English and train technologies that combine artificial intelligence and sensing techniques. Students of related majors in colleges and universities who are interested in related technologies are welcome to sign up to learn related knowledge, train practical skills and obtain credits from the School of Instrument Science and Engineering of Southeast University.

Seminars

1. Artificial Intelligence and Challenges in Machine Learning and Data Sciences (2 Credits) Seminar contact: liyuwen@seu.edu.cn
2. AI-Based Applications in Control Systems (2 Credits) Seminar contact: lifengzhu@seu.edu.cn
3. Matlab Programming for Data Science in Smart Sensing (1 Credit) Seminar contact: huanglibin@seu.edu.cn

Application Dates

Application Open

May.1st 2021

Application Deadline

June.15th 2021

Application Details

- Please email your name, university, major to the seminar contact to register in different seminars
- Students in the school of instrument science and engineering in Southeast university do not need to register the 3rd seminar above
- All the seminars are organized online, no registration fee is required
